

CALENDAR CSAT QUESTIONS

One such type of question that needs an immense amount of practice is calendar test related problems. Although the frequency of this question is less in exams, yet they are of equal importance. If you have learned the basics of these questions then it will become very easy for you to solve it.

You can be asked whether the year mentioned in the question is a leap year or not. You will be given a date and a day and you will be asked to determine the day that will fall on the same date on next year and many other questions.

Type of Questions

- (i) To find the number of odd days.
- (ii) To find a day of the week.
- (iii) To find the day of a given date.
- (iv) To find the relation between the same day and date of two months in a year.
- (v) To find a day of the week when the reference day is not given.
